

2. new order: fish, dog, hippo, cat, duck, goose, snake

height = 4  
in-order sorts the same  
pre-order and post changes

3. best = fish, dog, hippo, cat, duck, goose, snake  
worst = cat, dog, duck, fish, goose, hippo, snake

4. Balanced trees are faster because you eliminate half the tree in each step. Unbalanced are basically linked lists.
